**Ohio's Narrative Report  
Consolidated Report on HAVA Title I, Section 101 Fund  
January 1, 2005 through and including December 31, 2005  
Due February 28, 2006**

On behalf of Ohio Secretary of State, J. Kenneth Blackwell, I am submitting Ohio's Narrative Report as required by Public Law 107-252 (the Help America Vote Act (HAVA) of 2002). Below are some the highlights that Ohio has achieved through the implementation of HAVA:

**Section 101 Funds:**

- Ohio negotiated the lowest price in the Nation for voting systems to ensure that every Ohio County would have state-of-the-art equipment.
- From the beginning, Ohio sought input from election officials and voting experts for methods to ensure a smooth and seam less transition from punch cards to new voting systems.
- Before final State certifications for Direct Recording Electronic (DRE) models were issued, Secretary Blackwell engaged Compuware Corporation to conduct extensive security reassessments and revalidations. This included the Nation's most thorough review of all hardware and software, including source code and voter-verifiable printer accessories.
- Further, before the 2005 General Election, each of the 15,000 new machines was individually tested for accuracy by an independent verification and validation vendor.
- Ohio's first large-scale use of electronic voting systems (which included voter-verifiable paper trails) was a great success during the November 8, 2005 General Election.
- Nearly one million voters used more than 15,000 new voting machines and the Ohio Secretary of State's office was overwhelmed with positive reports.
- More than 20,000 poll workers and election officials attended over 671 training classes of at least three hours in length.
- We created a short internet how-to, step-by-step video for our YourVoteCountsOhio.org web site for the TSx AccuVote DRE machine in both high and low bandwidth file sizes for easy access in three different media player formats: QuickTime, Windows Media, and Flash. A step-by-step HTML guide to the AccuVote TSx, based on the video, was also available to people who were unable to download the video.

ORIGINAL

- In addition, a Flash-based interactive simulation of how to use the TSx machine was created to supplement our voter outreach efforts.
- We also produced a how-to, step-by-step, four color tri-fold brochure template for the TSx, which could be customized for each individual county. These brochure PDF files were available on our YourVoteCountsOhio.org website in high and low resolution formats for voters to download and print.
- We also produced the same brochure in a wallet-sized template for counties to use. Approximately 1.5 million tri-folds and 250,000 wallet sized were delivered prior to the November election. For the one county using the AccuVote-OS, an optical scan machine, we created a step-by-step four-color tri-fold brochure template, which could be customized for that County. A PDF file of the brochure was available on our YourVoteCountsOhio.org web site for voters to download and print. We also created a short internet how-to, step-by-step video for our YourVoteCountsOhio.org web site to demonstrate the AccuVote-OS.
- Our office created two comprehensive poll worker training videos demonstrating the proper way to set-up, open and close the polls on Election Day for the AccuVote TSx and AccuVote-OS machines which were distributed to all counties using Diebold machines in the November 2005 General Election. Counties had the option of a DVD or VHS format.
- Four hundred roving technicians traveled to polling locations where the new electronic voting machines were used. The technicians answered questions and addressed any problems when necessary. Also, each precinct was equipped with emergency paper ballots in case of technical difficulties not immediately correctable.
- Voters with disabilities were able to use the features of the new systems to vote without assistance, ensuring the privacy that all other voters expect and deserve.
- Ohio's Computerized Statewide Voter Registration List was fully operational as of December 9, 2005.
- Ohio submitted a revised State Plan, *Changing the Election Landscape in the State of Ohio*, which was published in the *Federal Register* May 7, 2005.
- Fifty-seven Ohio counties selected a direct recording electronic (DRE) voting device with a voter verified paper audit trail (VVPAT)
- Thirty-one Ohio counties will use a combination of a precinct count optical scan system as the primary voting system with either a DRE/VVPAT or an AutoMARK combination to meet the requirements of HAVA for individuals with disabilities.
- Over of Ohio's 88 counties have already successfully used Section 301 compliant voting systems in the November 2005 General Election. Efforts are currently

underway to test the remaining counties' equipment prior to use in Ohio's first Federal election, which is the May 2<sup>nd</sup> primary.
